

Year 5

Endangered Animal Project

This project will ...

1. Develop children's understanding of global environmental issues at an age-appropriate level.
2. Empower pupils to take meaningful action within their school and local community.

This project links to: Preserving Nature

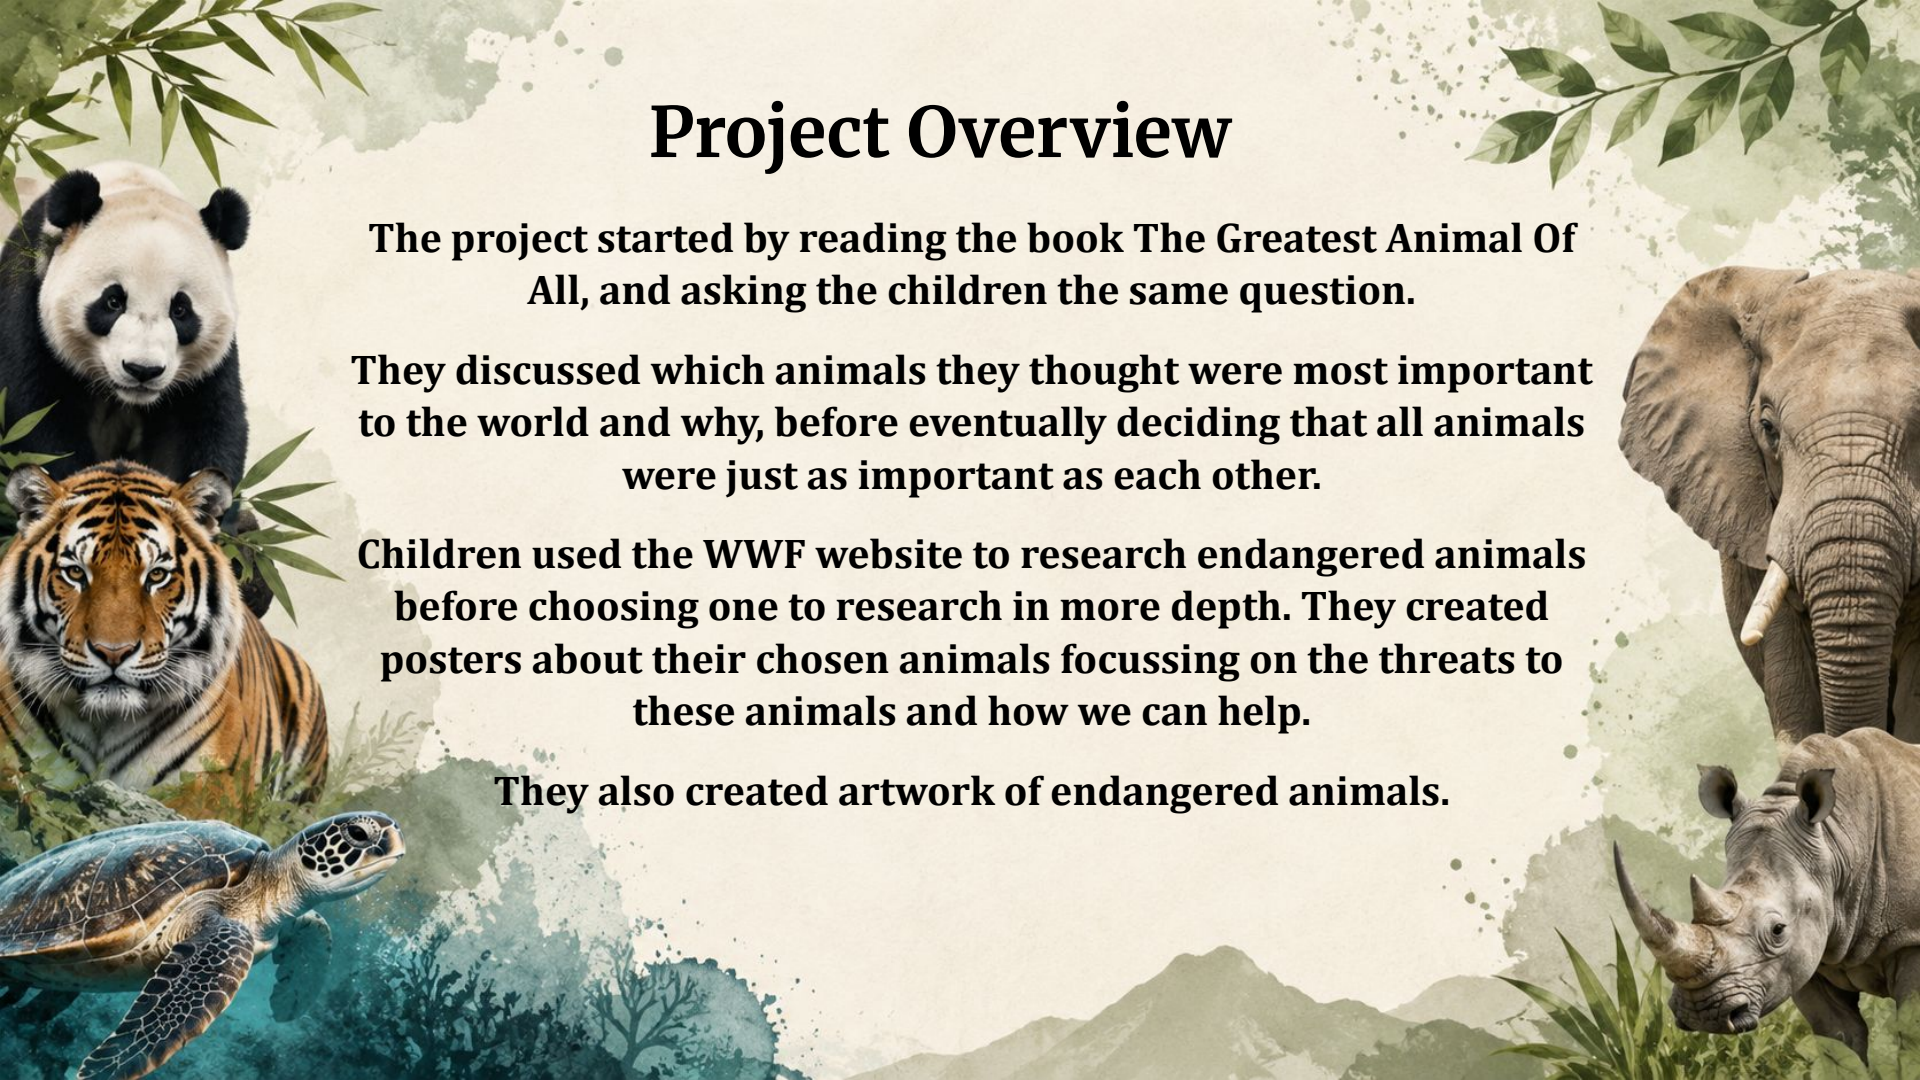

Project Overview

The project started by reading the book *The Greatest Animal Of All*, and asking the children the same question.

They discussed which animals they thought were most important to the world and why, before eventually deciding that all animals were just as important as each other.

Children used the WWF website to research endangered animals before choosing one to research in more depth. They created posters about their chosen animals focussing on the threats to these animals and how we can help.

They also created artwork of endangered animals.

Project Evidence

Project Evidence

POLAR BEARS!

Did you know? Polar bears can swim for days. They are the largest cat in the world.

Polar bears are often found in the Arctic.

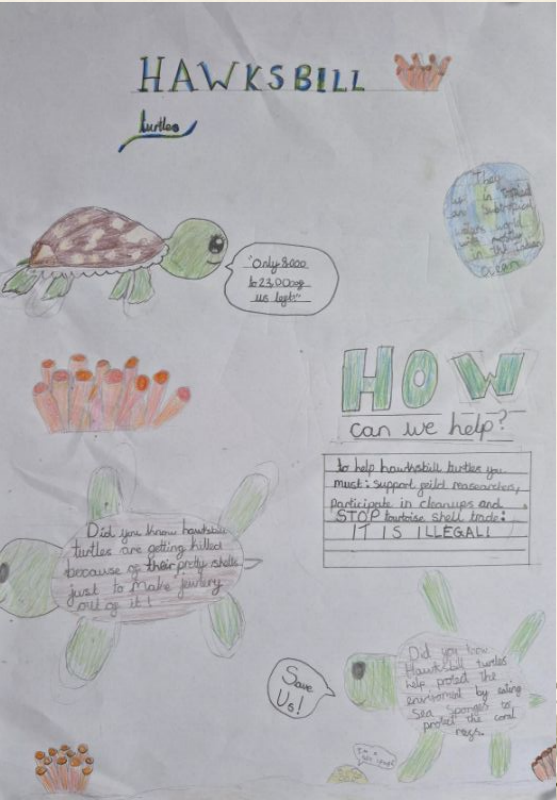

WE CAN HELP!

Consider purchasing RENEWABLE ENERGY like electric cars!

Polar bears are endangered.

A male polar bear can weigh as much as 10 men.

32RM

HAWKS BILL

Hurtles

Only 3000 Hawks Bill are left!

HOW can we help?

To help Hawks Bill turtles you must:

- Support gold resources
- Participate in cleanups and
- STOP turtle shell trade!
- IT IS ILLEGAL!

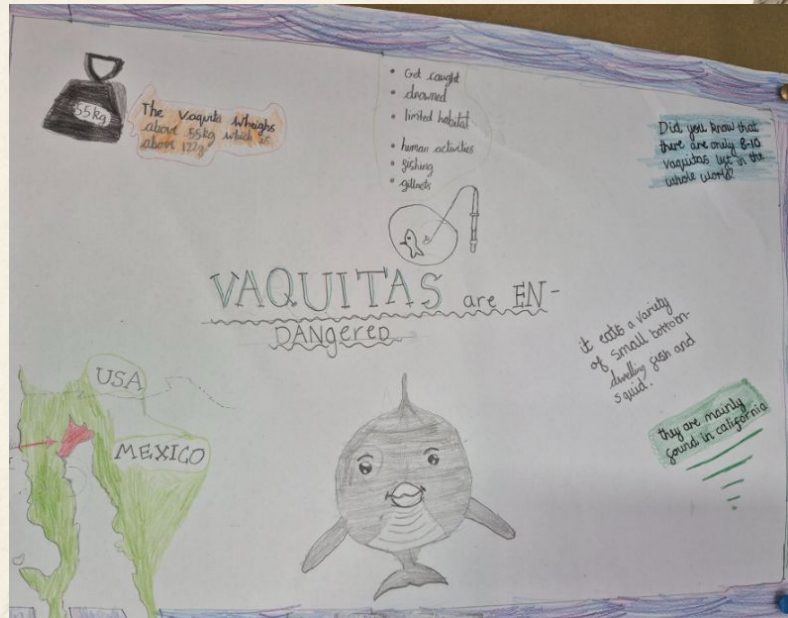

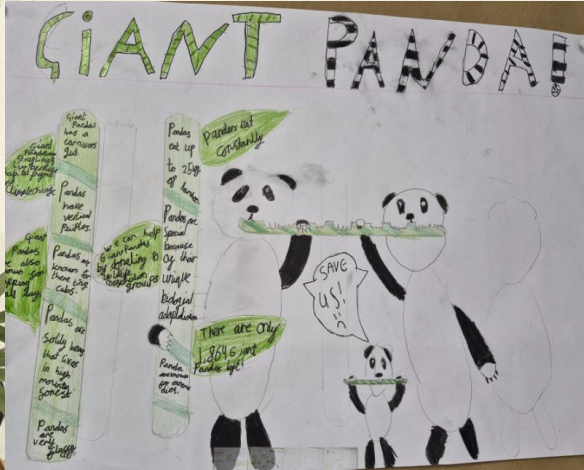

Did you know? Hawks Bill turtles are getting hurt because of their pretty shells. Just to make jewelry out of it!

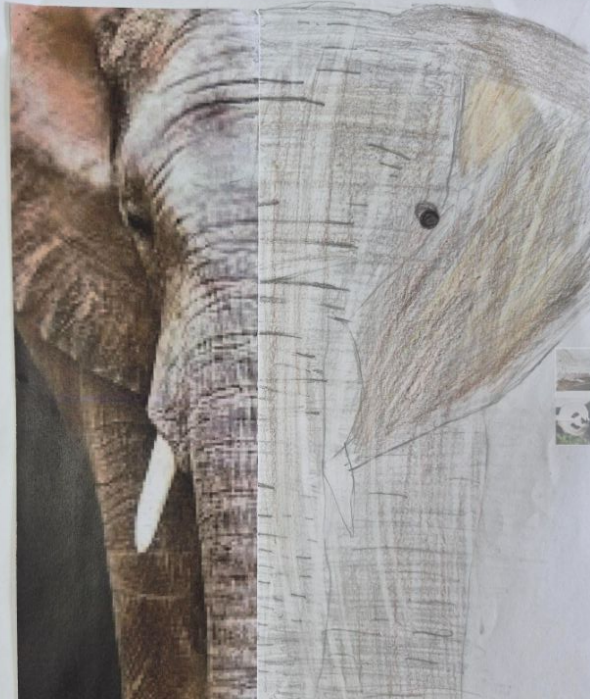

Save Us!

Did you know? Hawks Bill turtles help protect the environment by eating sea urchins to protect the coral reefs.

Project Evidence

Project Impact

As a result of our work, the class wanted to adopt an animal through the WWF. They voted to adopt a snow leopard and brought in 50p each to fund this.

We are looking forward to enjoying the updates on our snow leopard.
